EDUCATION

University of Virginia, Charlottesville, VA
Ph.D. in Economics — Expected May 2027
M.A. in Economics — 2025

Yonsei University, Seoul, Korea
M.A. in Economics — 2021
B.A. in Economics — 2019

RESEARCH FIELDS

Monetary Policy, Time Series Econometrics, Macroeconomics, Fiscal Policy

PROFESSIONAL EXPERIENCE

Federal Reserve Bank of Atlanta, Research Department
Visiting Scholar — August 2026

International Monetary Fund, Independent Evaluation Office
Short-Term Consultant — Fall 2024
Fund Internship Program (FIP) — Summer 2024

WORKING PAPERS

**Scheduled presentation; †accepted but declined*

1. **"How the Financing of Balance-Sheet Policy Shapes Its Effects"** (Job Market Paper)
   [SSRN] [PDF]
   Presentations: 2026 North American Summer Meeting (Econometric Society); Federal Reserve Bank of Atlanta, August 2026; 2026 UVA–Richmond Fed–Duke Jamboree*; Tenth SNDE Continuing Education in Macroeconometrics Workshop, Reserve Bank of Australia, Sydney†; 2026 Southern Economic Association Annual Meeting*

   Abstract: I ask whether the financing of Federal Reserve balance-sheet policy shapes its effects on real GDP and the price level. In a monthly U.S. SVAR I identify two balance-sheet shocks, one financed by reserves and one by overnight reverse repurchases (ON RRP). Identification combines sign, zero, and narrative restrictions with shifts in the volatility of the structural errors. Both balance-sheet contractions lower the price level, and only the reserve-financed contraction lowers GDP. The reserve-financed shock is the most important driver of the GDP forecast error over the early quantitative easings, the COVID easing, and the first quantitative tightening. It pushes GDP above its forecast over the two easings and pulls it below over the tightening. Over the ON RRP drain of the second quantitative tightening, the ON RRP-financed shock is the most important driver of the price-level forecast error, and it pulls the price level below its forecast.

2. **"Sharpening Economic Interpretation with HARS"** (with Tao Zha)
   [NBER Working Paper w35483] (Submitted)

   Abstract: We develop a unified framework that combines shock volatility with sign and narrative restrictions and provides the theoretical foundation for the computationally efficient sampler HARS. HARS preserves the heteroskedastic likelihood and can be combined with any posterior simulator for the heteroskedastic model. In monetary policy, oil market, and fiscal policy models, the same restrictions deliver substantively different economics once shock heteroskedasticity is accounted for. Homoskedastic SVARs put uncertainty in the wrong place, pushing shock-scale variation into impulse-response uncertainty. Heteroskedasticity sharpens dynamic responses, alters economic conclusions, and restores 90% credible intervals as a practical standard for economic inference.

WORK IN PROGRESS

1. **"From Underestimation to Overshooting? A Reappraisal of IMF Fiscal Multiplier Assumptions Across Crises"** (with Jeremie Cohen-Setton)

PUBLICATIONS

1. **"The Macroeconomic Consequences of Stimulating Offline Consumption during COVID-19"** (with Myungkyu Shim and Minseung Kim), *Global Economic Review* 50 (1), 2021, 86–106

SEMINAR AND CONFERENCE PRESENTATIONS

2026 North American Summer Meeting, Econometric Society
Federal Reserve Bank of Atlanta, Research Department seminar, August
UVA–Richmond Fed–Duke Jamboree, October (scheduled)
Tenth SNDE Continuing Education in Macroeconometrics Workshop,
Reserve Bank of Australia, Sydney, November (accepted, declined)
Southern Economic Association Annual Meeting (scheduled)

TEACHING AND RESEARCH EXPERIENCE

University of Virginia

Research Assistant
EconTAI (Prof. Anton Korinek) — Fall 2025

Teaching Assistant
Introduction to Econometrics (Prof. Ahnaf Rafi) — Fall 2024
Money and Banking (Prof. Carter Doyle) — Spring 2023, Fall 2025
Principles of Macroeconomics (Prof. Carter Doyle) — Fall 2022, Fall 2023
Principles of Microeconomics (Prof. Carter Doyle) — Spring 2025, Summer 2025

Yonsei University

Research Assistant
Prof. Myungkyu Shim — Fall 2020

Teaching Assistant
Advanced Macroeconomic Theory (Prof. Seonghoon Cho) — Fall 2019

Technical Assistant
Ministry of Finance and Samsung Economic Research Institute — Spring 2021
Converted MATLAB code to Python for Weekly Economic Index and Nowcasting models

SKILLS AND ADDITIONAL INFORMATION

Programming: Python, Stata, MATLAB, R, Julia, LaTeX
Languages: Korean (native), English (fluent)
Citizenship: Republic of Korea
